

Emergent Strategy

The way complex systems and patterns arise out of a multiplicity of relatively simple interactions

Emergent Strategy: A philosophy for creating change that mimics the natural world. Instead of using rigid, top-down plans, make it Simple.

Complex Intelligent systems can arise from these small adaptive efforts. Approach values the quality of relationships

1

Fractals : Small shape The LARGE

the patterns of the universe Repeat.

Fracts

The Individual
begins with you, how
you practice **justice,**
care and presence,

Roots

The community
Your personal patterns replicate
in your relationships and
small groups, forming a
collective culture

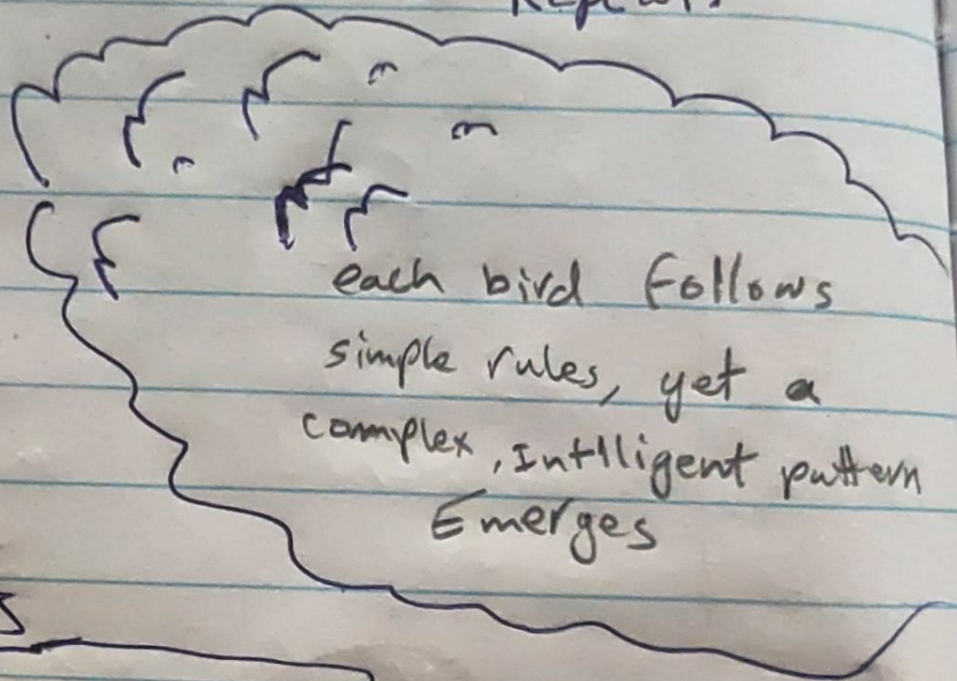

Possibility

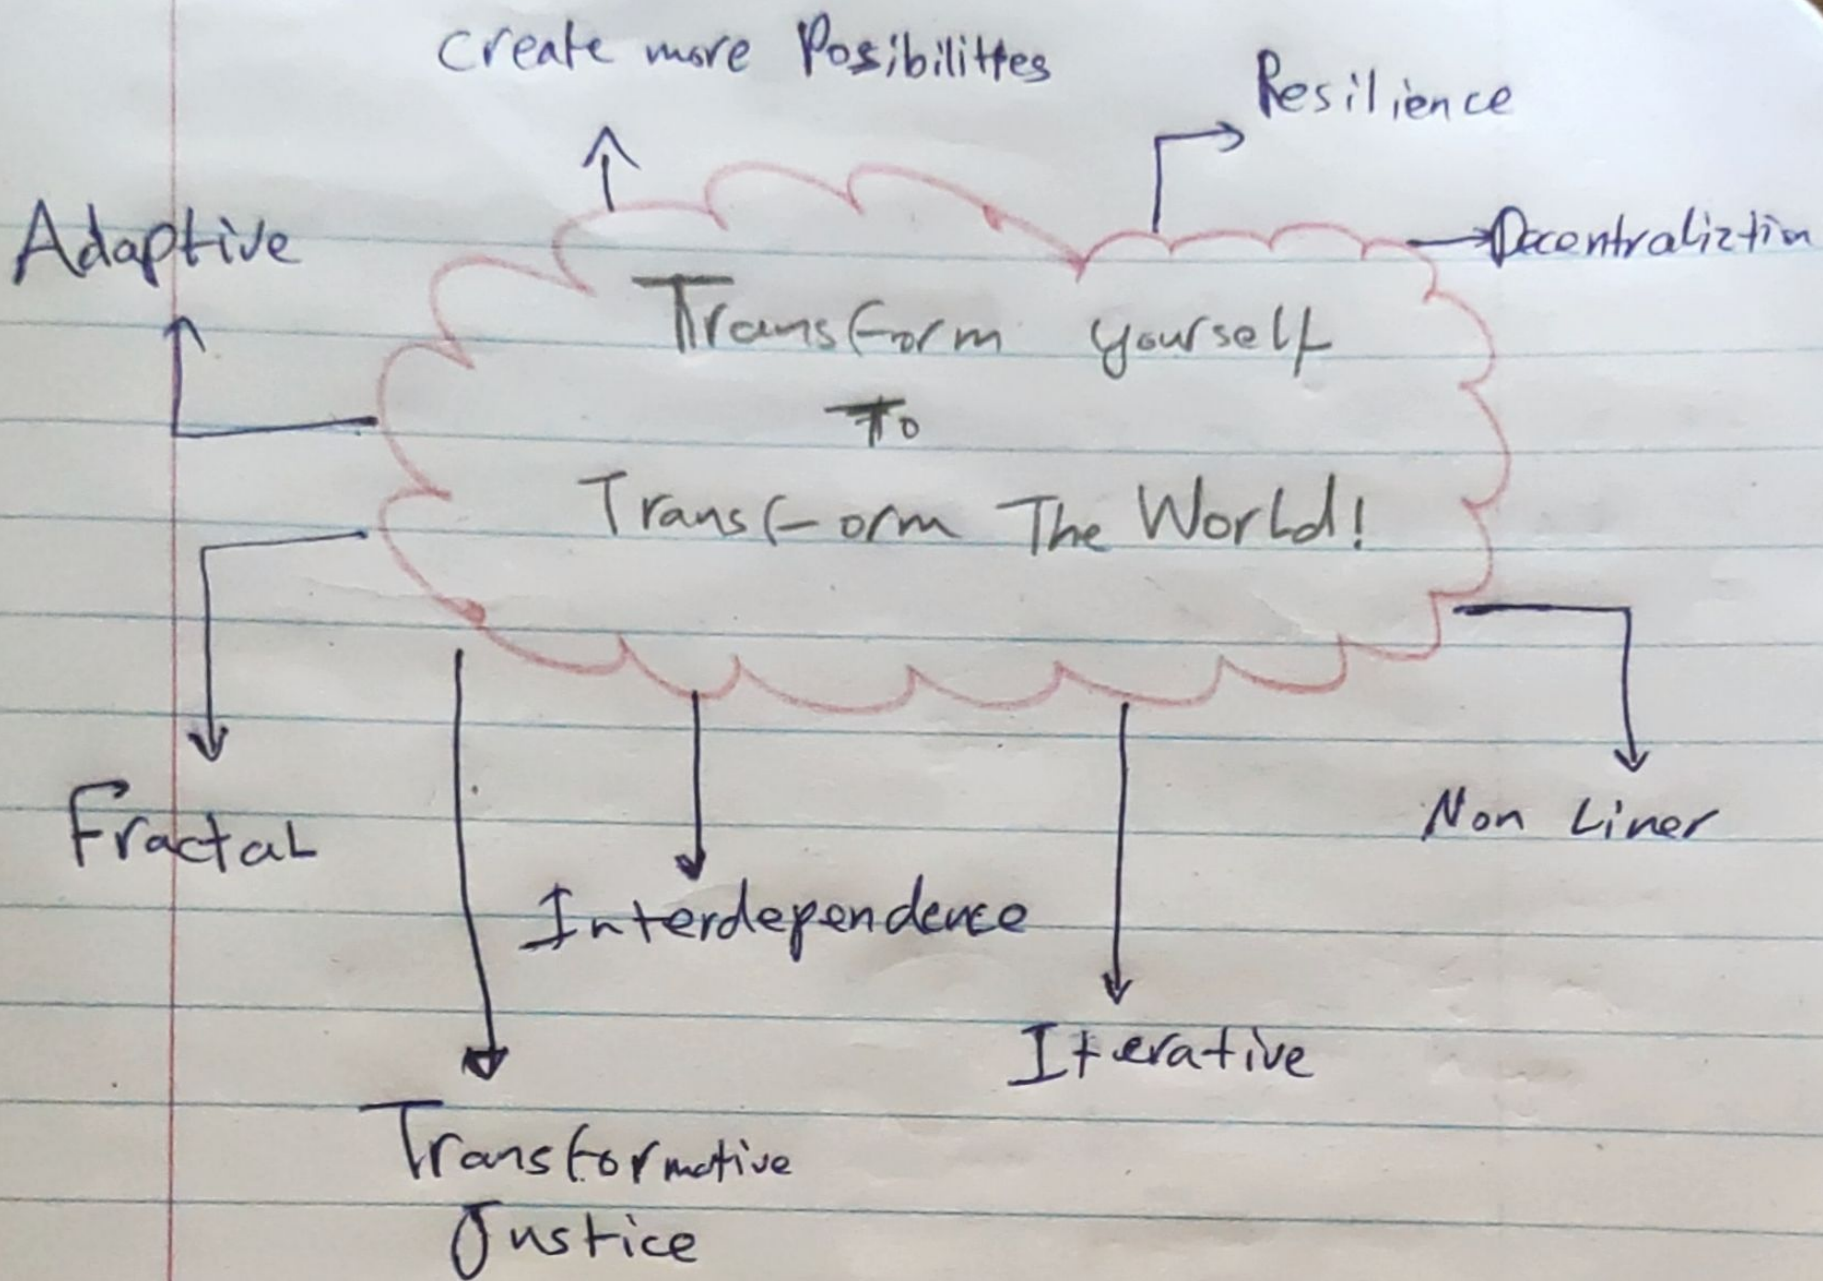

The World

Healthy local cultures
scale up, seeding
the possibility for
just and liberating

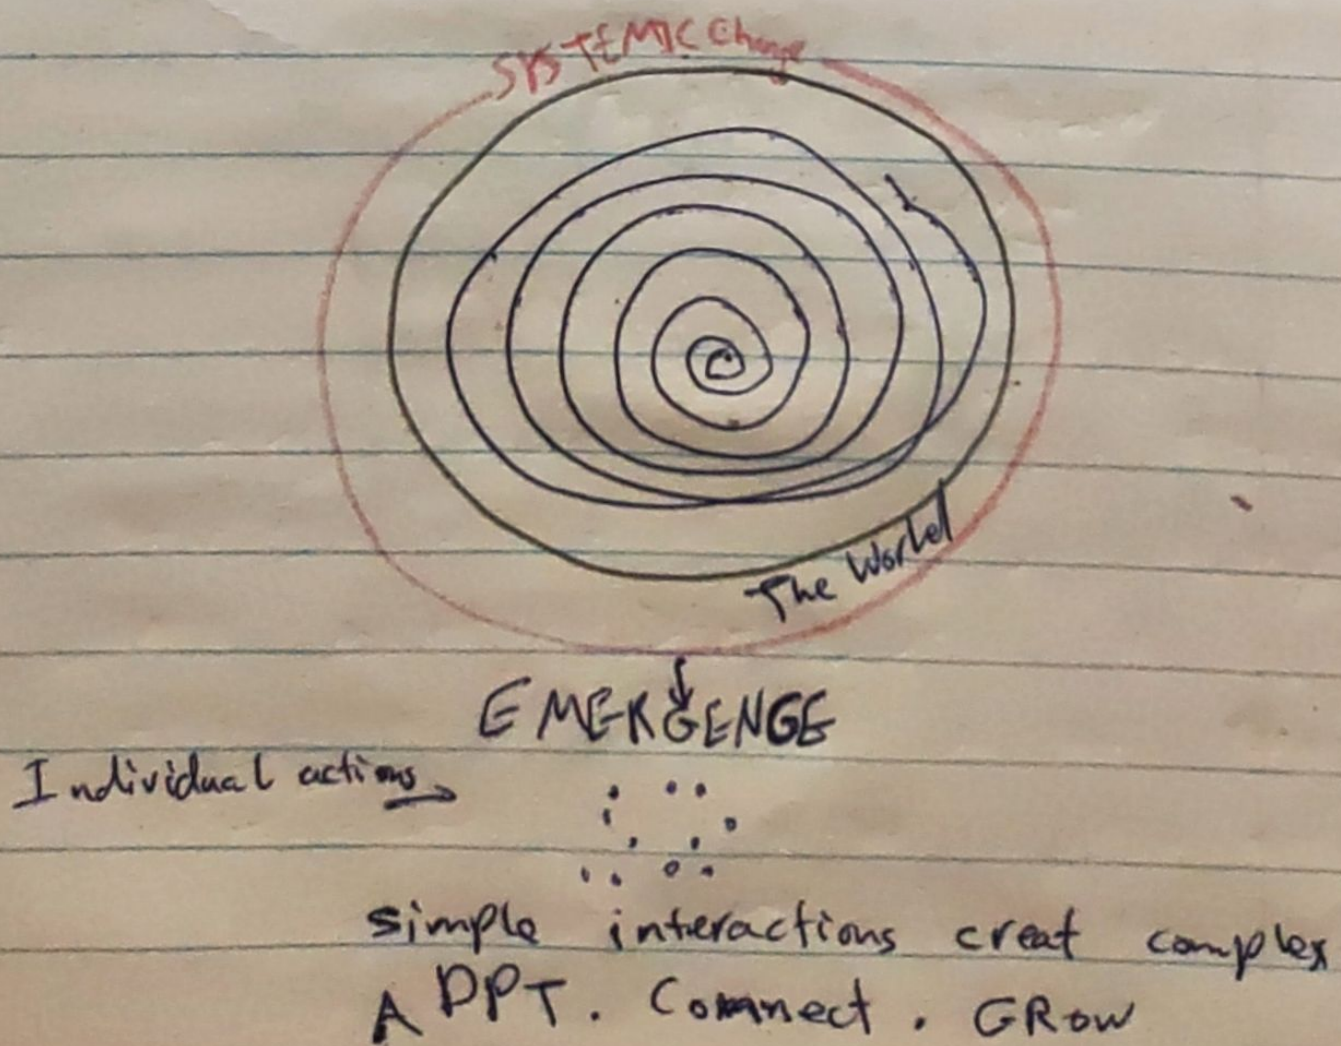

Remember

As above As below

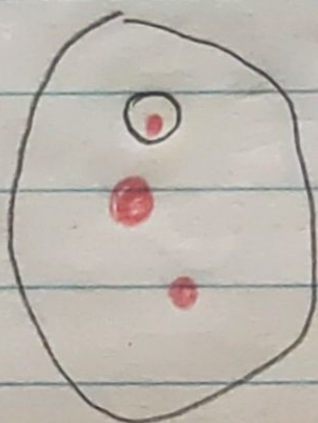

Emergent STRATEGY: From small to LARGE

The Inward Journey

"Everything tells you: go out, go out, go out, go out. I think we need to go in, go in, go in, go in...."

The Wound of Trauma

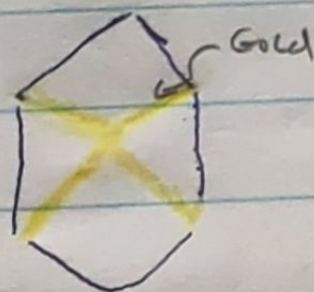

It lives in our tissues,
muscles, and habits.
disrupting our core
need for

[SAFETY
BELONGING
DIGNITY]

The Work: Healing

Kintsugi Heart

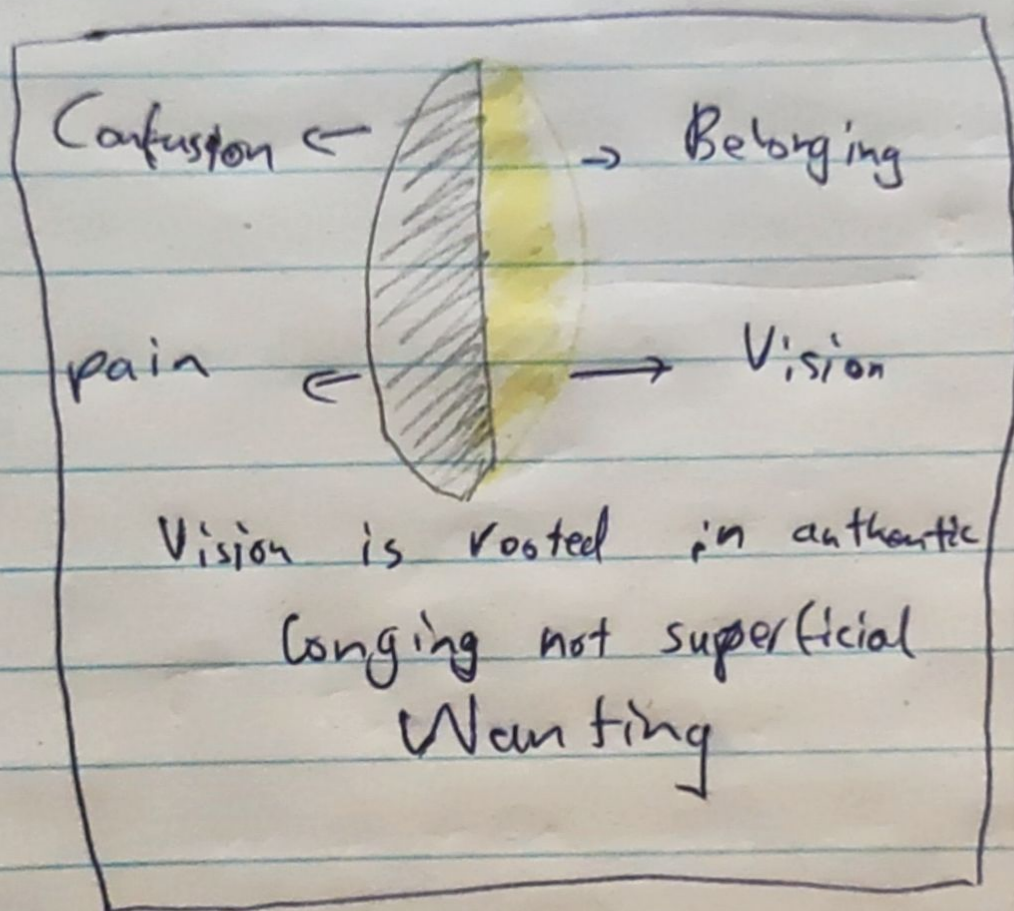

Healing is not hiding
the breaks, but making
the Beautiful ♡

The cracks are fixed
with gold of commitment
and Resilience

The way Forward : Vision

Vision & Heal Tree

Healing is not a destination
but an Orientation

it is the work of enlivening our interiors
waking up from what quebec, and
bringing this aliveness in the
World with love.
